INTELLIGENT POLE BASE

More Than a Block
of Concrete

Amenity Storage at Every Pole.

The Intelligent Pole Base has the capacity to house advanced, technological components used to power service amenities such as car chargers, video displays, cameras, WiFi and more.

*Technology is changing the world,
and what used to be ordinary, is being reimaged.*

This simple yet innovative parking lot light pole base has untapped potential for future technology. By reimagining its shape and creating physical space, an infrastructure for current and future technology is born.

Intelligent Pole Bases can house EV Charging, which will promote the use of Electric Vehicles showing consumers that your property is EV friendly.

Intelligent Pole Bases allow the use of digital signage for advertising store and restaurant promotions, parking availability, event information or other mass notifications, eliminating one-time use vinyl banners. Allowing you to display a single message or multiple advertisements IPB's also provide a powerful platform for fiber-optics, networks, cameras, WiFi, 5G small cell, Emergency Blue Phones, Car Counting, Egress Lighting, Battery Backup, Wireless Mesh system, Air fiber, Temp power and countless other systems.

More Amenities = More Revenue

Our Intelligent Pole Base is compatible with virtually all industry technologies and equipment allowing you to customize your light poles according to your needs today, and tomorrow.

Add value to property

Studies show that amenities like EV Charging, WiFi, security presence, and music create loyal customers and increase traffic. This adds value to any property.

Create a profit center

IPB's installed throughout your parking lot generate profits through Digital Advertising and EV Charging.

A more attractive lot

Our base hides unsightly installations of technology by eliminating add-on boxes, allowing you to offer your visitors the most aesthetically-pleasing lot experience possible.

Future technology

Who knows what the future will bring. As new technology becomes available, the Intelligent Pole Base provides a secure location for future tech.

Electric Vehicle Charging

The Intelligent Pole Base allows property owners to add electric vehicle charging stations that can be disbursed throughout parking areas, rather than being limited to a bank of chargers in a single, inconvenient location.

- ✓ **Drives Cost Efficiency**
Increased utilization of parking lot
- ✓ **Maximizes Number of Chargers**
Up to 4 vehicles per pole with chargers distributed throughout the lot
- ✓ **Increases Revenue Generation**
Become a destination area and charge \$/kwh

IPB Vu Digital Displays

For advertising, directions, branding, and much more.
